Lancaster Farming

Vol II. No. 42 | Quarryville (Lancaster County) Pa., Friday, Aug. 30, 1957 | $2 Per Year

THE NEW STATE POULTRY QUEEN is Miss Margaret McPherson, New Park, York County. She was selected Saturday at Dutch Days in Hershey. Runner-up was Miss Penny Hoffman, R1 Catawissa, left. The queen was crowned by Miss Elizabeth Erb. Judges were Miss Mary Rissinger, Penn State; Dr. M. W. Allam, University of Pennsylvania; and Richard Clark, WFIL-TV, Philadelphia. (LF Photo)

Drouth Damage $12 Million; Tobacco, Hay Crops Hardest Hit

Total drouth damage this year is estimated at $12,050,331 by County Agent Max M Smith in a special report released Monday

This would be a loss of about 32 per cent from the bumper crop of 1956 and 40 per cent of the value of the 1955 crop

Smith based his figures on a average of the 1955-56 crops which would make the overall loss about 35 per cent of normal.

Hardest hit, according to Smith, is the silage crop which is cut 50 per cent At a 40 per cent loss are corn, hay, pasture, and potatoes, 30 per cent of the value of the tobacco crop is lost; a third of the vegetable crop, a quarter of the oat crop, and a tenth of fruit crop

However in dollar value, the tobacco is hardest hit. $3,399,210 will be lost by county farmers in reduced yields and quality this year. The next highest figure is hay at $1,873,400 followed closely by vegetables at a loss of $1,200,000.

The barley, wheat and rye crops, harvested before the dry weather had a chance to affect them, are listed as normal.

In addition to actual losses from crops, Smith listed $472,000 as lost by farmers in trying to establish new hay seedings He estimated that most of the new seedings are a 60 per cent loss.

The light rainfall which fell generally throughout Lancaster County Sunday is not expected to help the situation appreciably. For most crops it was a case of too little too late.

With only 20 inches being reported at Lancaster, the rain did little more than settle the dust. In the southern part of the Garden Spot more rain was reported. A heavy thundershower deposited at least half an inch of rain generally, according to unofficial observers.

The parched northern townships failed to better themselves much with only about .20 inches being measured.

Heavy rains fell in New Jersey and Maryland effectively breaking the drouth in those states. New Jersey, hit earlier by the hot dry spell, had requested federal drouth aid, only to be refused by President Eisenhower

Leader Says Four Counties Need Federal Aid

Governor George M Leader said this week that although formal requests from Bucks, Montgomery, Berks and Chester Counties for federal drouth aid have not reached his desk, that he can "in good conscience recommend Federal disaster aid."

This statement followed his tour of the drouth stricken counties.

"As a man who has spent most of his life on a farm, I think I know a little about what farmers believe The farmers we talked with on this trip are typical of farmers throughout the State. They make a habit of standing on their own two feet, with reliance in themselves, and they don't ask for any kind of help unless they really need it," the Governor added

"It looks to me as if some areas will get only one-tenth of the normal yield of corn, one-third of the tomato and potato crop and that the beans are completely dried out."

United Kindom Taking Less U.S. Produced Lard

Although total lard imports by the United Kingdom during the first five months of 1957 were up considerably from the same months of 1956, the U.S. share of this market dropped from 86 6 per cent during the January-May 1956 to 65 8 per cent for the same period of 1957

Countians Win Two Seconds In Contests

Lancaster County entries batted 000 by losing four contests over the past weekend. But two of the contestants came in second

In the state poultry cooking contest held Saturday at Pennsylvania Dutch Days at Hershey, W R Hutchinson came in second Winner was Mrs Marin Weller, North Race St, Richland, Lebanon County.

And in the state Peach Queen finals, Miss Joanne Gamber of Lancaster lost out to Miss Rose Marie Fries, 16, of Chambersburg at the peach desert baking contest Saturday in York Miss Fries baked a Bavarian cream pie

State poultry queen for 1957 is a York Countian, Miss Margaret McPherson, 18, of New Park A Penn State freshman this fall, Miss McPherson plans to go into some phase of radio or television dramatics.

Runner-up in the contest was Miss Penny Hoffman, R1 Catawissa, Columbia County.

Red Rose DHIA Issues First Report Of Production Under New System

The first report on dairy herd improvement records under the new machine record keeping system was issued this week by the Red Rose DHIA.

The records are for the month of June; however it includes only those herds which had been computed by July 10 Some herds tested in June, therefore, will not appear in the current report. Curtis E. Akers, head tester who prepares the report, said that these herds will be included next month.

The herd having the highest monthly butterfat average wa that of Ivan G. Martin, R1 Ephrata. This herd averaged 1,284 pounds of milk and 52 pounds of butterfat. The herd of R John Yost, R2 Narvon was second with 1,310 pounds of milk and 48 pounds of butterfat.

The highest 305 day record was completed by a registered Holstein owned by John C. Metzler, R1 Christiana. This cow produced 19,707 pounds of milk and 723 pounds of butterfat.

Second high 305 day record was completed by a registered Holstein in the herd of Albert R Fry, R1 Manheim. Her record is 17,044 pounds of milk and 707 pounds of butterfat.

Here are the 10 top herds in June:

Herd	Milk	Fat
Ivan G. Martin	1,284	52
R John Yost	1,310	48
Harry S. Mumma	933	47
A. W Wickenheiser	1,304	52
John O. Hershey	1,182	47
Edwin N. Kurtz	1,303	46
John C. Metzler	1,226	45
Marvin A. Eshleman	1,303	45
Clair H. Witmer	929	45
Amos M. Stoltzfus	1,249	45

The usual listing of cows above 70 pounds of butterfat will not be avaiable due to the change in record keeping systems.

The junior division of the poultry cooking contest was won by Miss Kathryn Yoselson, R1 Montrose. Runner-up was Miss Pauline Long, Myerstown.

The Lancaster County contestant was Miss Barbara Eby, 1013 Lititz Pk., Lancaster.

Max Smith

Now Is The Time . . .

By MAX SMITH

County Agricultural Agent

TO BREED FOR FALL PRODUCTION — Many efficient dairyment are making a special effort to have mixmum milk production in the fall and early winter when milk prices are more favorable. It seems like good management to sell a product when the prices are the highest. The delay in breeding of cows at this time in order to fresh in August or September may mean greater returns next fall.

TO DETERMINE FORAGE NEEDS — It might be wise to survey your hay and silage needs for this winter and try to locate your supply before next spring. If drouth conditions are removed in the near future, it might relieve this buying pressure and purchases could be made later in the fall. From all appearances at this time roughage prices will advance in this part of the country.

TO PREPARE FOR WINTER OATS — Winter oats should be seeded in Lancaster County during the middle of September (10th to 20th). LaConte or DuBois are the recommended varieties at the rate of two bushel per acre. They should be seeded on well drained soil and either a 4-12-12 or an 0-20-20 fertilizer applied Not any nitrogen on soils where lodging is a problem.

TO BEWARE OF "SILO FILLER" DISEASE — Silo-filling time is at hand and many crops of drouth-stricken corn are being ensiled. This requires a word of caution because of the poisonous gas that may form in the partly-filled silo or in the silo chute during or shortly after the filling operation. These nitrate gases are more severe when filling with stunted corn in dry weather. Operators should not go into the silo alone and not before running the blower for several minutes to remove any dangerous pocket of gas.

Broilers Steady for Third Week At Lancaster Exchange Thursday

LANCASTER — Broiler prices remained relatively steady for the third consecutive week with 139,000 broilers averaging 22 76 cents at the Aug 22 sale at the Lancaster Poultry Exchange

The price range was from 22 to 23¾ cents.

A lot of pullet capettes sold for 26¾ cents and 450 capettes sold for 30 cents

A year ago 57,750 broilers averaged only 20 15 cents with the low being 19 cents and top birds bringing only 20¾ cents

Here is the sale listed by lot number, owner with grower in parenthesis, amount and breed, age in weeks and days, buyer and price

1 William R Myer, 12,500 Arbor Acre White Vantress, 9, C F. Manbeck Inc , 23 cents 2. William R Myer, 12,500 Arbor Acres White Vantress, 9, C, F. Manbeck, Inc , 22¾ cents 3 David H. Martin, 1,800 Martin Bowman cockerels, 10, Walter C Mellinger, 23½ cents 4 Allen E Moyer, 1,650 Red Vantress, 10 6, College Hill Poultry, 23 cents 5 Mrs. Jacob Cramer, 400 White Vantress, 10 6, Martin M Brendle 23¾ cents.

6 Harvey M Zimmerman, 2,000 White Vantress, 10 5, Roy E. Ream, 23½ cents 7 Harvey M. Zimmerman, 2,500 White Vantress, 10-5, Carl B Risser, 23½ cents 8 Harvey M Zimmerman 2 000 White Vantress, 10 5, Carl B Risser, 23½ cents 9 Lloyd E Forry, 375 White Vantress, 10-2, J Robert Charles, 23½ cents 10. Fed Steer Prices Lower in Chicago; Lancaster Reflects in Slow Trading

By DAVID S. LORENSON
Federal-State Market News Service

LANCASTER—Receipts three days, Cattle, 3,3,541, calves, 655; hogs, 1,271; sheep, 707 Three days ago. Cattle, 4,318, calves, 788, hogs, 1,265, sheep, 568.

CATTLE Under the influence of fairly liberal receipts fed steer prices at Chicago moved lower as the week opened. Most of the decline was wiped out in Wednesday's trade as prices moved upward under moderate offerings In Wednesday's market steers grading good and below mostly steady. The 12 major markets in three days received 216,000 cattle compared with 217,000 for the same three days last week and 260,000 for comparable days in 1956 Prices of steer beef in the New York dressed meat trade were around $1.00 lower than late last week.

In the Lancaster market fed steers Monday sold weak to 50 cents lower than a week ago in a rather uneven trade, cows and bulls sold fully steady Compared with Wednesday a week ago stocker and feeder steers are now weak to 50 cents lower. Bulk choice fed steers at Lancaster $24-26, high choice and mixed choice and prime $26-27, a few loads prime $27 50 a couple part loads prime 1,528 lb. fed steers $27 and $27.50.

Standard, good and low choice heifers brought $18-22.50 Most utility and commercial cows $13.75-15 75, canners and cutters $10-14.50, high yielding Holstein cutters to $15.00. Utility and commercial bulls, $16.25-19.50, good fed yearling bulls to $22.50, cutters down to $15. Bulk of the medium and good stocker and feeder steers and light yearlings 498-1,000 lbs. sold from 19-21 50, part load 694 lb. good stock steers $22. Load 1,200 lb good fleshy feeders $21 50. Good 450-500 lb. stock steer calves $21.50-22.25. Common stock steers $16.50-17.50.

CALVES veal calves mostly steady. Bulk good and choice $23-28, high choice and prime $29 and $30 Utility and standard $15-22 50.

HOGS Compared with last Wednesday, barrows and gilts strong to 25 cents higher, sows fully steady to strong In Wednesday's trade barrows and gilts mixed US 1-3, 180-240 lbs sold from $21 75 22.25, a few lots No. 1 and 2, 200-220 lbs. $22.50 and $22 75 Small lots mixed grade 160-180 lbs $21.00-21.75 Weights over 240 lbs. scarce. Sows mixed US 1-3, 270-550 lbs. brought $14 50-18 50

SHEEP Slaughter lambs mostly steady with last Wednesday. Bulk good and choice 75-90 lb. native and Virginia native spring lambs $22-25 00, utility and low good $16-21 50, culls down to $13.

LANCASTER FARMING CLASSIFIED ADS PAY

HEALTHY BABCOCK BESSIE says:

Feed a High Quality Laying Mash

Feed the very best quality laying mash you can find in your locality Try to buy it at the best possible price If you are feeding a "price feed" and not getting top lay, I suggest that you put one pen of pullets onto the best quality mash you can find and see what happens You should see a difference in two to four weeks

It is a mistake to feed a ration that contains coarsely ground particles of grain that the birds can sort out from the rest of the mash This usually causes poor production and trouble from cannibalism

Babcock Customers Well Informed. You have two advantages over your neighbors if you become a Babcock Bessie customer. One is you have one of America's really fine commercial layers and second, if you read our literature you will be well informed on what's going on in the poultry business

PROFIT Farming
calls for WD-45 power

Four-plow, 4-row equipment often gives you the capacity to keep ahead of crops and weather. You have plenty of work power with a WD-45 pulling a 4-bottom plow or 12½-foot double disc harrow. This is the big-acreage equipment to swing YOUR crop production to the profit margin. TRACTION BOOSTER system cuts wheel slippage, saves fuel, can give you up to 25% more work capacity per day. Power-Shift rear wheels and SNAP-COUPLER hitch offer minute-quick job changeover. Two-clutch power control gives crop-saving PTO operation.

When crop and weather say GO . . . be ready with a WD-45 Tractor. It's sensibly priced for profit farming.

TRACTION BOOSTER and SNAP COUPLER are Allis Chalmers trademarks

In Case Of Emergency

A team of USDA, State, and local specialists throughout the Nation stands ready to go into action in case of emergency to save our livestock and crops from disease and destruction.

This team now operates on a full-scale, peacetime basis to help prevent any foreign livestock and plant pests and diseases from coming into our country and to control those we already have. It is also set up to slip quickly into high gear in case of biological warfare — deliberate use of disease-producing agents against animals and plants. One of its important new functions is to tell our farmers how to minimize the effects of radioactive fallout on livestock, crops, and farm products.

This country has been able to defend itself in past wars because of the production of our farms and factories. In the future, however, an enemy may attempt to weaken or destroy these resources by any means possible. Deliberate introduction of disease as an act of sabotage, for instance, could cripple our livestock and crop industries. That could limit our food supply as well as many sources of clothing and medicine.

An enemy could select the host, disease, time, and place of outbreak to make animal and plant disease control more difficult and to cause devastating losses. Similar disease could be introduced at the same time to confuse diagnosis and eradication. It's unfortunately true that some animal diseases — native and foreign, harmless and fatal — have similar symptoms and are difficult to distinguish. Combining different diseases might produce contradictory signs and different incubation periods.

Our Federal Civil Defense Administration realized the potential threat of deliberately caused animal and plant disease. So, in September 1954, FCDA delegated to USDA the responsibility for protecting our crops and livestock against biological warfare. This job was given to ARS because of the longtime experience of its regulatory personnel in handling cooperative State-Federal operations. ARS immediately organized a countrywide series of meetings to establish a plan for coping with biological warfare. Participating were State and Federal regulatory officials, representatives of diagnostic laboratories, State experiment stations, and agricultural and veterinary colleges.

These planners knew that control of biological warfare on livestock meant, basically, control of foreign diseases. Principles of disease control and eradication are the same, whether diseases get in accidentally or delibe rately. Thus, planners decided the best way to deal with biological warfare on livestock was to have a well-trained standby force that could be quickly expanded in time of war. With this in mind, a State-Federal Emergency Animal Disease Eradication Organization was set up in most States to deal with dangerous animal diseases of foreign origin.

In the past, we've looked upon many animal and plant pests and diseases as peculiar to Europe, Asia, and Africa. But today's fast intercontinental air transportation and the buildup of trade and travel have given such pests and diseases new importance. These factors, plus our own fast livestock marketing, have greatly increased the danger of accidental and deliberate transmission. Furthermore, we have at least 8,000 domestic insects competing for our food and fiber. Deliberate dissemination of foreign plant pests would complicate an already complex control problem.

Up until now, times has been on our side. Shipments of livestock by sea took from 15 to 30 days. This period gave most diseases time to develop signs that could be observed. Today, for the first time in history, we are importing more animals by air than by ocean vessel. Animals arrive in hours instead of days.

We move animals rapidly within our borders, too. The nationwide outbreak of vesicular exanthema in swine is a forceful example of how fast animal disease can spread. VE was limited for many years to California until 1952, when it escaped via raw garbage sent out of the State. Within 6 weeks, 18 States reported the disease, and a short time later, 13 more.

This Week in Lancaster Farming

BY JACK REICHARD

50 YEARS AGO (1907)

A progressive town in the dairy section of the west had inaugurated as a regular feature in its annual public events a dairymen's picnic, which was held for the twofold purpose of recreation and education. The picnic was arranged by officials of the Cooperative Dairy Assn. working with the business men of the town, and invitations were extended to all residents and people residing in the surrounding countryside.

Folks were asked to bring well filled baskets of eatables, while the committee provided free amusement in the way of merry-go-rounds, band concerts and sports of various kinds. Following the picnic dinner a program featuring talks and demonstrations on dairy subjects were presented by dairy experts from the state agricultural college.

POTATO DIGGING DEMONSTRATION

Quite an interesting potato digging demonstration took place on the farm of E. Henry Haines, southern Lancaster County, 50 years ago this week. Haines, who had 16 acres in potatoes, was contemplating the purchase of a mechanical digger and was anxious to secure the most satisfactory machine on the market.

He invited several dealers to make a demonstration in his potato field. Representatives of "The Hallock" and "The Hoover" machines responded. Prior to the demonstrations three disinterested persons were chosen to act as judges They were B. Z Hess, of Willow Street, Joseph Ross, Oxford, and G. Bromfield, Rising Sun, Maryland.

Both machines were demonstrated under favorable and unfavorable conditions and did excellent work. The first report of the judges was a disagreement, but they finally decided in favor of the Hoover digger because "they believed it separated the vines from the potatoes better".

Four horses were used to pull each digging machine. A large crowd of potato growers from Lancaster, York and Chester Counties, and points in Maryland had assembled to witness the demonstrations.

Elsewhere in lower Lancaster County that week, Jacob Graybill of near The Buck, suffered a crushed right hand and had the little finger torn off, while helping to set a threshing machine into position on the farm of Phares Evans.

In Montana, a half century ago, where the raising of sheep was one of the leading industries, it was common for the owners of large ranches to clean up $150,000 a year with a minimum of effort.

Montana headed the list in the sheep and wool industry in 1906, with same 4,940,000 sheep which yielded 35,815,000 pounds of wool valued at $8,523,970.

* * *

Farmers in Michigan during the year 1906 raised more than 5,000,000 bushels of beans, from which they realized between $8,000,000 and $10,000,000.

* * *

With the development of the electrical sciences in the 1900's, it is interesting to note that the world's copper output in 1881 was placed at 63,000 tons selling at 18 cents per pound and amounting to $65,000,000. In 1906 the annual production was 800,000 tons selling at a little over 20 cents per pound, amounting to $365,000,000.

25 Years Ago

Fire of unknown origin destroyed a large barn, chicken house, two wagon sheds and a straw shed on the farm of Warren Bailey, near Cochranville in Chester County, causing damage estimated at $25,000.

The fire was discovered by Miss Mabel Bailey, a daughter of the owner, who was awakened by the flames and roused members of the family, then summoned the Atglen, Oxford and Parkesburg Fire Companies.

The blaze had gained such headway when the firemen arrived that they were unable to save the buildings.

The season's crops, including a large supply of hay and wheat, and all farm machinery were destroyed. A calf, seven chickens and 20 turkeys were burned.

During the height of the fire, sparks swept across two fields and threatened a barn on the property of David McMillian. The Christiana Fire Company was summoned to protect the building.

$100,000 BLAZE AT ELKTON, MARYLAND

A downpour of rain, close proximity of big Elk Creek, and the efficient work of a dozen fire companies within a radius of 25 miles, saved the town of Elkton, Md., from being destroyed, 25 years ago this week.

The fire broke out in a lumber storage building of the Elkton Supply Co. and quickly gained such headway that two other large buildings and a double residence were destroyed. The loss was estimated at $100,000.

* * *

That same week lightning destroyed a barn on the Lancaster farm of Benjamin B Shelly, R3 Manheim. The loss was estimated at $10 000.

The flames spread through the barn to a corn barn, tobacco shed and hog pen.

Manheim firemen saved the tobacco shed and also prevented the dwelling from catching fire, but the barn and two smaller buildings went up in smoke. Three cows, two mules, a bull, eight hogs, two dogs and a number of chickens and rabbits perished in the fire. The season's crops and all farm machinery, including a tractor and fodder cutter, were destroyed.

MAN FROZEN TO DEATH

Back in August, 1932, Harry Lanfersieck, 49, of St. Louis, was frozen to death.

Lanfersieck's body was found in a vat partly filled with brine in a refrigerator car where he had gone to get ice. He apparently had stepped into the vat, thinking the frozen brine was solid. He broke through and was unable to climb up the slippery slides of the vat.

The Long Island Potato Growers Assn in New York State voted not to sell potatoes for less than 65 cents a hundredweight, 25 years ago this week.

About 1,000 potato growers attended the gathering and pledged support to New Jersey growers in a move to boost potato prices.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Background Scripture: II Kings 22:1—23:30, II Chronicles 34—35
Devotional Reading: Psalm 119:57-64.

In Capitols

Lesson for September 1, 1957

PEOPLE in capitols have tremendous power. A President, a senator, a parliament, a cabinet member . . . whether it is the county court house or the world-renowned capitol building of a mighty nation, the people who work under the dome, just because they work there, have a leverage for moving public opinion, for getting things done on an immense scale, a power far greater than any one of them has by himself. The man there in his office, or in his seat in the legislative chamber, may be, and usually is, a man of parts, a man above the average in personality and ability. But however able the man under the dome may be personally, his office gives him even greater power. The voice of the man who was elected carries more weight than the voice of the man he defeated.

Dr. Foreman

November Is Coming

The ancient Hebrews were a democratic people in some ways, but in others they were most unlike us. At the time of King Josiah the kingship was by no means an elective office. "And his son reigned in his stead" is the regular formula. So the Hebrews had at that time nothing to say about who should be their kings. They took whatever son the royal harem produced first. For good ones (there were some) they thanked God, and for the bad ones they were thankful they were no worse. King Josiah, whose story may be read in the Background Scripture, was one of the outstanding good kings. But it was custom and tradition that made him king, not the people. With us it is different. The people have to decide who shall occupy our places of great power. November is coming; many will be elected, many more defeated, in our American elections. It is not too soon to ask ourselves seriously, what kind of men do we want under our capitol dome? Sometimes the choice offered us makes us discouraged so that we stay at home and don't vote. But even if all we have is a choice between two third-raters, a good third-rater is better than a poor one. If we have good men in our capitols, it is our responsibility to see that they get there.

Little Capitols

It's a peculiar thing, but often true, that although candidates for local offices can be better known than those for state or national office, rascals and ne'er-do-wells are more often elected to the small offices than to the large ones. For some reasons, local government gets less attention from the voters than it should. The mayor of a single large city, today controls more power over more people than King Josiah ever did. It is in the "little capitol" if you like, the county court houses for example, that public affairs sometimes take the wrong turn. Where there is a public program well conceived and organized, it can look good as a public law, it can look good as it comes to the states . . . but when it goes through the local courthouses it can turn into some pretty rotten trickery. In a certain state not long ago federal funds for a very good purpose had to be cut off from a dozen or more countries because the officials there had been lining their pockets with easy money. It's a poor voter, one with a small sense of responsibility, who takes pains to elect good senators and presidents, but who when it comes to voting the local ticket, just says, Oh well . . . and votes straight because it's easiest.

Capitols Can't Do It All

The sad truth is, King Josiah's reforms didn't stick. They didn't, because they were reforms from the top. Even an absolute monarch can make his country no better than his people want it to be. It is true, we ought to have the best officials, from town to county to state to nation, that we can elect; but even if they were all praying, intelligent, devoted Christians, they cannot make this a better country merely by passing laws. Like Josiah, our men in government can make this a better country. Only if we the people want to have it so.

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Dairymen to Select Favorite Dairy Barn Equipment Dealer

Just to be different, instead of a queen, dairy farmers in a 14 state area—Maine through Maryland and west to Michigan—will vote a favorite dairy barn equipment dealer this summer.

The dealer receiving the largest number of votes through the contest period—July 1 to Sept. 15—will fly to Paris, France, with his wife for a two week all-expense paid vacation

As a token of appreciation for their votes, all dairymen that cast votes for the winning dealer will receive a gift mailed back to them by the dealer from France

Albert J Magness acting as spokesman for the contest committee told those present at the kick-off meeting in Bel Air, Md., that all dairy barn equipment dealers in the 14 state area are eligible to register for the contest regardless of the manufacture of equipment handled Only dairy farmers are eligible to vote and official ballots must be used All dealers are required to register on official registry cards also, he said.

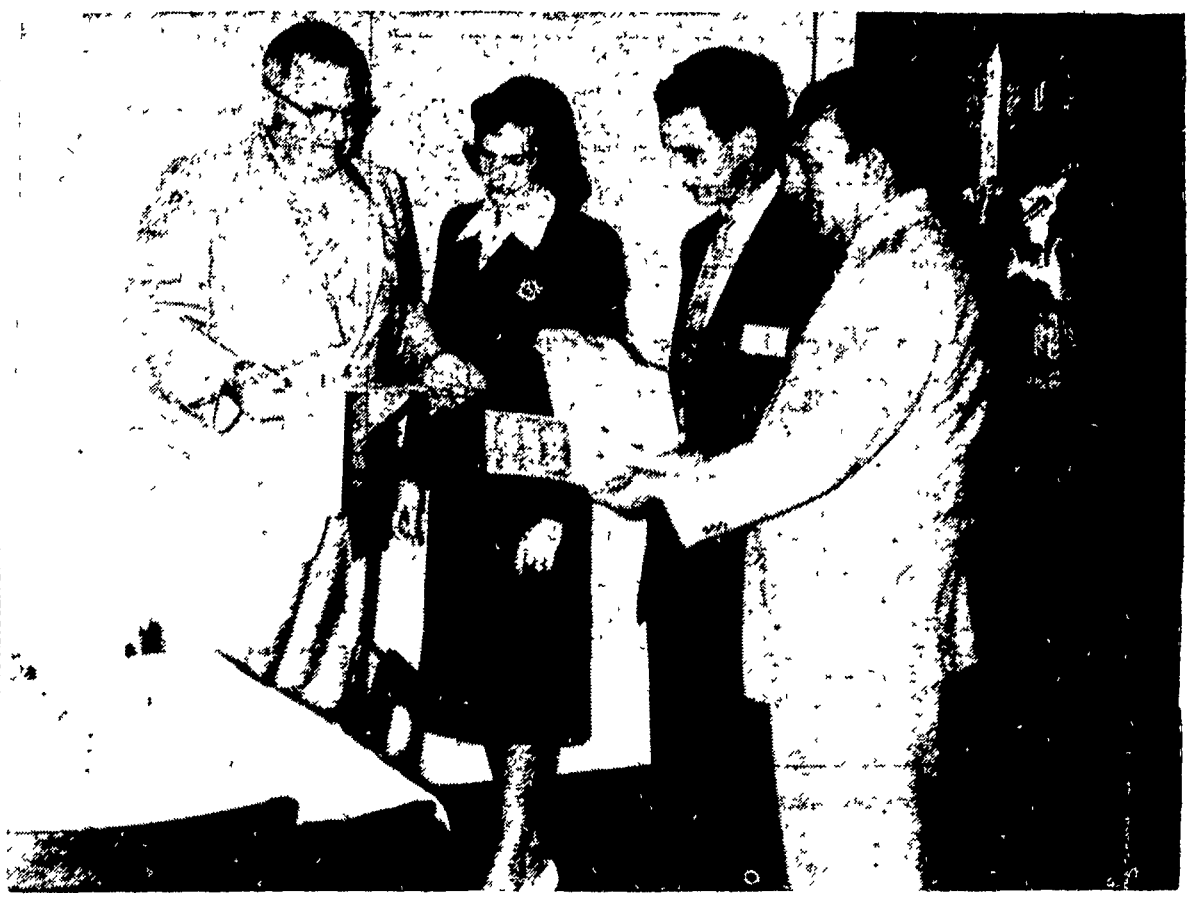
Donald L Ace, Penn State dairy specialist in charge of barn remodeling and herd management and a member of the contest committee, told the gathered group that "a dairy farmer himself knows how valuable the assistance is that his daily barn equipment dealer neighbor gives him year in and year out, but it isn't too often that anyone really pats the dealer on the back for the many favors done the dairyman during the year

"We thought it would be nice to call attention to the fellows at the cross-roads equipment stores who often pitch in during odd hours to thaw out and replace frozen barn pipes, do fast weld jobs on broken barn door tracks, or make barn renovation plans, limited space and farm budgets meet"

The selection of a favorite dairy barn equipment dealer is being sponsored by Standard Equipment, Inc , Bel Air. Among the co-sponsors are dairy and extension groups in the various states: Slaysman Co., Baltimore; Lincoln Electric Co., Cleveland; Southern Galvanizing Co., Baltimore, W. Ames & Co., Jersey City, N J , and Lasting Products Co., Baltimore.

Folders describing the contest and registration cards are available to dairy barn equipment dealers from any of the sponsoring groups.

Ballots for dairy farmers and folders describing the contest are available from the same groups and from local dairy barn equipment dealers participating in the contest.



FRENCH HOSTESS, craft gifts, and tours of the French countryside all enter the picture here as Standard Equipment Inc , Bel Air, Maryland looks over plans for its unique search for a favorite dairy barn equipment dealer Left to right: Albert S. Magness, president of Standard Equipment Inc.; Air France hostess, Bud Hartung, M. W. Hartung & Associates, New Holland, and Tracey Preston in charge of Standard's Dairy Barn Equipment Division.

Letter to the Editor

Dear Sir A subscriber asked for this verse. It is very dear to me as I still remember it from my youth and now again my children had it in school, so it makes it more plain to me.

Great, wide, beautiful, wonderful world
With the wonderful waters around you curled
The wonderful grass upon your breast —
World you are beautifully dressed

The wonderful air is over me,
The wonderful wind is shaking the trees,
It walks on the water and whirls the mills
And talks to its self on top of the hills.

You friendly earth how far do you go,
With the wheat fields that nod and rivers that flow,
With cities and gardens and cliffs and isles
And people upon you for thousands of miles?

Ah! You are so great and I am so small
I can hardly thing of you world at all.
And yet when I said my prayers today
My mother kissed me and said quite gay.

You are more than the earth
Though you are but a dot
You can love and think —
And the earth can not.

Esther Weaver
Manheim, Pa.

HERE IS THE NEW PURINA HOG PROGRAM
1. Start litter on new, improved Purina Baby Pig Chow. Then creep feed Purina Pig Startena until 3 weeks after weaning.
2. Put pigs on growing ration of 4 parts grain and 1 part Purina Hog Chow until pigs are about 3 months old.
3. For last 6 weeks, feed 9 parts grain to 1 part New Purina Hog Chow. Feed either free choice or mixed, in correct proportions.

Now...market hogs in 4⅔ months

New Purina feeding program weans pigs at six weeks.... grows pigs to 190 lbs. in 4⅔ months... cuts feed costs 4%...1 lb. of pork for every 3.26 lbs. of feed, from weaning to market... conditions sows faster for next farrowing.

Every year more proof piles up that hogs should be fed according to age and weight requirements. Young pigs use feed differently than do older hogs. They need more protein... more vitamins... more of the expensive parts of the ration. But, as pigs grow, they become more efficient users of carbohydrates—the less costly part of rations. The proportion of cheaper carbohydrates can be rapidly increased.

Tests at the Purina Research Farm showed that this new program cut feed costs an average of 4% below any previous Purina Program... produced each pound of pork on only 3.26 lbs. of feed from weaning to market. It also gave sows the chance to recover faster from farrowing and nursing. Sows were ready to breed again in less time than when pigs were weaned at 9 weeks.

Improved Purina Hog Chows Make Program Click

Purina Baby Pig Chow and Pig Startena, the famous Fast-Start Twins, have been further improved to take advantage of the newest research findings. Purina Hog Chow has been improved to the point where you may now use 33% more grain during the last six weeks than on previous Purina Hog Programs. Be sure to feed right... follow the recommended steps closely. The fast gains, early weaning, and increased efficiency of this new Purina Hog Program can be yours when you feed these high-quality Chows in the way research has proved they should be fed for top results.

For the Farm Wife and Family

Fresh Green Vegetables Keep Color If Cooked in Small Amount of Water

BOILING FRESH GREEN VEGETABLES

Fresh green vegetables need not take on a washed-out look when cooked properly. If they are cooked until tender but still slightly crisp, and cooked under cover, they can look — and taste good enough to bring calls for second helpings.

Boiling is a very familiar and easy way to cook green vegetables but to keep fresh color and flavor, care needs to be taken not to overcook.

For boiling, use lightly salted water — half a teaspoon salt and a half to a cup of water, depending on cooking time. Bring the water to a boil before adding the vegetables. After adding the vegetable, cover the pan. When the water boils again, reduce heat. Some green vegetables, such as shredded cabbage or spinach leaves, may require as little as three minutes to cook tender. Green lima beans may take 20 to 30 minutes, snap beans 15 to 30 minutes.

When boiling leafy greens, such as spinach and beet greens, the water clinging to the leaves after washing them may be all the water needed in cooking Put the greens into the pan, adding salt in layers throughout. Reduce heat after steam begins to escape and cook slowly to prevent sticking.

Serve the vegetables promptly. Flavor will suffer when they are allowed to stand.

* * *

Speaking of vegetables, here is a recipe for beets with orange sauce for added flavor Why not serve a vegetable plate menu as follows· Beets with orange sauce, corn pudding, summer squash, hardcooked eggs and sliced cucumber salad with mayonnaise dressing on lettuce, whole wheat muffins, butter and milk, for dessert, sliced fresh peaches and ice cream.

BEETS WITH ORANGE SAUCE

3 cups cooked beets
⅓ cup vinegar
1 cup orange juice
1 tablespoon cornstarch
1 tablespoon butter
¾ teaspoon salt

Cook beets until tender, then slice, cut in small pieces, or serve whole if beets are small. To make the sauce, combine vinegar and cornstarch and add to it the hot orange juice. Cook sauce until thickened and glossy. Add butter, salt and cooked beets. Heat to blend flavors, and serve.

Mix all together and bring to a boil. Add: prepared cantaloupes or watermelon rind, as much as the vinegar will cover. Cook until fruit is soft. Put into jars, cover with boiling syrup and seal.

12 DAY PICKLES

Mrs. Abram E. Landis, R2 Lititz

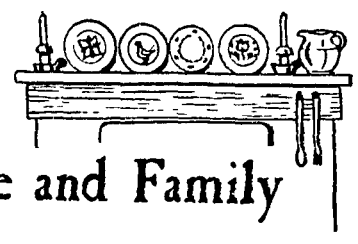
Wash and slice eight quarts pickles. Do not peel pickles.
BRINE:
4 quarts water
2 cups salt

Bring to a good boil. When cool pour over pickles in a large crock. Cover pickles and let stand one week. Stir every day. Then drain pickles and cover with boiling water and let stand 24 hours. Drain again and again cover with boiling water with one teaspoon powdered alum added to boiling water. Let stand 24 hours and drain again. Then cover with hot syrup as follows:

8 pounds granulated sugar
2½ quarts vinegar
3 sticks cinnamon bark
1 box Pickling Spice

Boil syrup and pour over pickles; let stand 24 hours. Drain

For the Farm Wife and Family



syrup and bring to boil; again pour over pickles and let stand two days. Drain and pack pickles in jars. Heat syrup to boiling and fill jars and seal. Do not boil pickles at any time.

Pickles may be left in crock if so desired.

POLISH PICKLES

Mrs. Abram E. Landis, R2 Lititz

Peel and cut into pieces ¾ to 1 inch in size
8 quarts pickles
2 cups sugar (granulated)
1 cup vinegar
¾ cup water
2 teaspoons salt
2 teaspoons tumeric
2 teaspoons dry mustard
2 onions sliced
As much alum as you can pick up on a knife tip.

Boil all together for 15 minutes put into jars and seal.

Thanks so much for sending us these recipes, Mrs. Landis. We're sure some of our readers will be trying them.

PREVENT GLASSWARE CASUALTIES

The twinkle of ice in a tall glass is music on any summer day.

The popularity of lemonade, iced tea and chilled desserts, however, can take a heavy toll of tumblers. Sudden changes in temperature are responsible for the untimely end of much glassware

To bring glassware through the summer without too many casualties, here are a few reminders on

care

Glass expands with heat, contracts with cold, and often cracks or breaks when forced to do either too suddenly. This is why hot water should not be poured over glass in washing or rinsing Instead, lay the glass gently in the water It's also why glass shouldn't go directly from refrigerator to warm dishwater, and why jars of food, hot from the canner, should not stand in a breeze to cool.

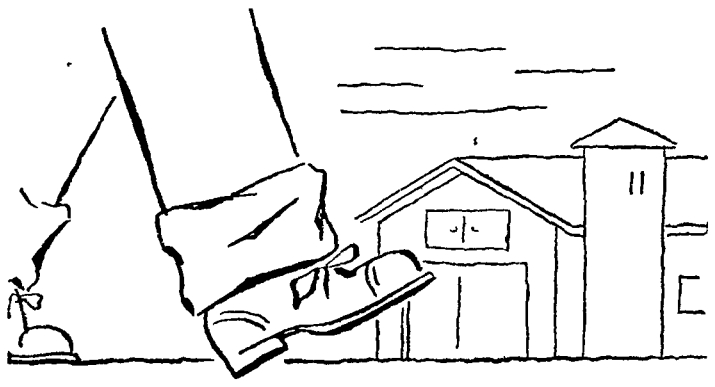
In making iced tea or coffee in the glass, pour the hot beverage in a china or pottery pitcher and then pour into glasses Incidentally, ice cubes should not be dropped carelessly into glasses. The force of their fall may crack the glass

To save glass from taking a rap in dishwashing, you can get circular rubber gadgets which fit over the end of faucets Also rubber mats for the bottom of the sink or dishpan, or for counters on either side of the sink. Many women like rubber-covered dish drainers.

Follow the time-honored dishwashing rule "Glass first, silver second, china third." It prevents the nicks, chips and scratches which often result from a miscellaneous jumble in the dishpan. Glass gets first place because it needs clean suds with no trace of grease in order to come out clear and shining.

The less glass is handled, the less chance of breaking Many women are finding that glasses will come out streakless without wiping if they are washed with synthetic detergents and rinsed in hot water

Last but not least, save glassware with convenient, safe storage arrangements Narrow shelves for tumblers allow each to stand separately with no stacking or doubling, and no reaching behind



FARMERS LED THE WAY!

Farm Wagons Exempt From Trailer License

A new state law relieves Pennsyvania farmers of the obligation to buy trailer licenses for each of their farm wagons, according to Secretary Robert Hartford of the Pennsylvania Farm Equipment Dealers' Assn

House Bill Number 637 of the General Assembly's 1957 session states that wagons are exempt from the ten-dollar fee when used to transport farm products of the owner. The exemption holds in going to and returning from the destination point of the produce.

Four-wheeled, rubber-tired wagons, commonly used by farmers for all kinds of hauling jobs, are covered by the new exemption. Previously, such wagons had to be licensed and equipped with brakes and lights, according to a strict interpretation of the 1929 act that applied.

Asphalt Paving & Crushed Stone

Quarryville, Pa.

Quarryville — STerling 6-2191

Ever stop to think what a real bargain long distance telephone service is? You can call clear across the country for just a few cents every hundred miles. And when you call long distance, station-to-station you can make three calls for the price of two.

Try long distance station-to-station service. Just give the operator the distant number you want and tell her it's a station-to-station call. By doing this you will save more than 30 per cent. And if you call after 6 p.m. or all day Sunday you'll find that the low rates are even lower.

DEAN R. HURLBUT

Angus Assn. Names New Youth Director

Dean R. Hurlbut of Raymond S D, has been appointed director of junior activities for the American Angus Assn. He assumes the duties formerly handled by Val Brungardt who resigned to become a member of the animal husbandry staff at the University of Wisconsin.

Dean, who started Aug. 1, will consider the United States his territory and will assist youngsters in all parts with their Aberdeen-Angus heifer and steer projects, in the organization of clubs and founding of purebred herds. The Association now has over 3,000 junior members. Already this year there has been a 23 per cent increase in memberships from the previous year.

Dean received his B. S. degree from the South Dakota State College in 1956. After graduation he worked as assistant county agent in Brown County, S. D. He started in 4-H work when he was 10 years old and was an active member of his local chapter until he entered college In college he participated in Ag Club, Block and Bridle and College 4-H activities. He was on the staff of the Little International Livestock show and was also a participant.

Also as an active member of the college livestock judging team he entered contests in Denver, Kansas City and Chicago and in meat judging he entered in Forth Worth, Kansas City and Chicago. For the past two summers he was assistant county agent in Kingsbury County, S. D. This work was primarily with 4-H Club boys and girls.

Victor Plastow Gets Promotion To Associate

Assistant County Agent Victor W. E. Plastow, of Lancaster has been promoted to Associate County Agent by the Pennsylvania State University.

Plastow was graduated from Penn State in 1953 with a degree in dairy production. He was named to the University agricultural extension staff as assistant county agent on September 29, 1953, and assigned to Northampton County. On July 1, 1954, he was transferred to Lancaster County. He is associated with County Agent M. M. Smith and Associate Agent H. S. Sloat. Their offices are in the Post Office Building, Lancaster.

His promotion was announced by Dr. H. R. Albrecht, director of agricultural and home economics extension, the Pennsylvania State University.

Before entering college, Plastow was a dairy herd improvement association supervisor in Northampton and Lehigh counties and later was dairy herdsman at the Norristown State Hospital.

Native of East Nauch Chunk, he is the son of Mr. and Mrs. Edward Plastow, of Benton, R.D. 2, and was reared on a farm. He was active in 4-H Club work and as a student at Benton High School was a member of the Future Farmers of America.

Plastow is married to the former Emma Jane Shoemaker, daughter of Mr. and Mrs. W. W. Shoemaker, of Walnutsport. They are the parents of one child, Nancy, aged 12.

Naaman Hershey Wins Blue Award In First Hay Show at Dutch Days

A sample of first cutting alfalfa won a first place for Naaman G. Hershey, R2 Lititz, in the-first state hay show held at Pennsylvania Dutch Days in Hershey. He was the only countian to win a blue ribbon in the contest.

The grand and junior champion Ayrshires were shown this year by Abram and Florence Flory, R3 Manheim. Grand champion was Selwood Beulah 2nd and the junior female was Mountain Valley Dixie Kate.

Kate was junior reserve champion at the 1957 Farm Show

The Flory's win this year was in the absence of the usually strong competition from Masonic Homes, Elizabethtown. The Homes had no cattle entered in the show.

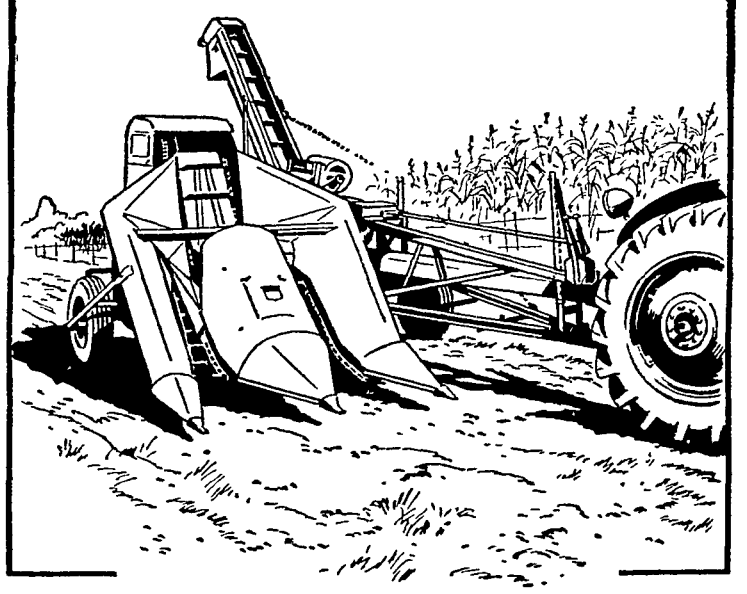
OLIVER PICKER

Gets more corn

...faster, safer, easier



You'll really bring in the corn with a two-row Oliver Model 3 pull-type. Long, aggressive snapping and husking rolls handle the big crops as well as the light ones. Adjustable spacing of snapping rolls...on the go—from the tractor seat...means less clogging.

Get a new Model 3 and you'll get more ears from those down and leaning stalks. Smooth shields and floating extensions ease the stalks into three long, low gathering chains. New fan and double-sieve cornsaver get corn cleaner, save the shelled corn.

There's added convenience in the new Oliver picker, too. Width is narrowest of all two-row pull-type pickers...saves corn opening fields, saves space in storage. Fewer lubrication points plus enclosed gear boxes save maintenance, speed up picking operations.

Reading Fair Offering Attractions Aimed at Children, Teen Agers

READING — There'll be an abundance of activities for the kids at this year's Reading Fair

Aside from the customary 4-H and FFA youth programs, fair officials have booked a number of grandstand stage attractions which have definite appeal for the young fry

The fair operates Sept 8 to 15

The current idol of the bobby soxers - Pat Boone - will perform on Tuesday night of fair week The Lone Ranger and Tonto will be present Thursday afternoon, and to make the attraction more enticing for the kids, all youngsters who attend the performance will receive a relica of the Lone Ranger's silver bullet

Other shows of more than passing interest to the teen agers are jalopy stock car races Wednesday night, and the Miss Reading Fair beauty contest finals Saturday night There will be two special school days at the fair — city kids day on Tuesday, and county day on Friday.

The remainder of the fair's superlative stage program includes AMA motorcycle races opening Sunday afternoon, Joie Chitwood thrill show that night, Futurity harness races late Tuesday and Wednesday afternoons, the Mills Brothers Thursday night, Farm Maid finals Friday afternoon, Jack Kochman's Hell Drivers Saturday afternoon, and USAC big car auto races closing Sunday afternoon.

One out of five calves born alive will die before it is two years of age because of disease or other abnormal, lethel condition, according to American Veterinary Medical Association statistics.

PENNSYLVANIA'S FINEST!
READING FAIR
OPENS SUN. SEPT. 8
RUNS THRU SEPT. 15
FEATURING PAT BOONE IN PERSON TUESDAY NITE SEPT 10
Also Mills Brothers, Lone Ranger, Horse Races, Jalopy Races, Motorcycle Races, Big Car Races, Stunt Shows, Stage Shows, Beauty Contest.
PROGRAM OF EVENTS ON REQUEST

Crop Report Optimistic After Rains

HARRISBURG — Late vegetable and fruit crops and early planted corn in southeastern Pennsylvania are expected to show signs of added growth as a result of Sunday rains, the State Department of Agriculture said today

Results of the weekly Federal-State Crop and Weather Summary for the period ended Monday indicate better tomato, potato, apple and peach sizes for local markets New tomato settings also will benefit.

PASTURES

For year round grazing sow a Swiss Permanent Pasture. Ready to pasture in 8 weeks. No more reseeding. We also have an excellent Hay — Pasture — Silage Mix 2-3 cows per acre grazing. Casupa — Super — Green Pastures.

Rough and Tumble Engineers Draw 20,000 to Ninth Annual Reunion

The ninth annual reunion of the Rough and Tumble Steam Engineers Historical Assn. drew a combined attendance of 20,000 last Thursday, Friday and Saturday.

The reunion, featuring steam propulsion and power of all sorts, was held at the Arthur S Young grounds in Kinzers

The model exhibits were handmade and antique engines of all descriptions Oldest engine present was a miniature made by James Watts in 1757, owned and exhibited by Joseph S Roches of Yardley, Bucks Co, Pa

On exhibit were engines providing power for thrashers, balers, a saw mill and a fan

In addition to the engines, there was a demonstration of the use of horses and dogs in providing tread power, and horses on a sweep

Steam engineers, young and old, from all over the East attended the annual event.

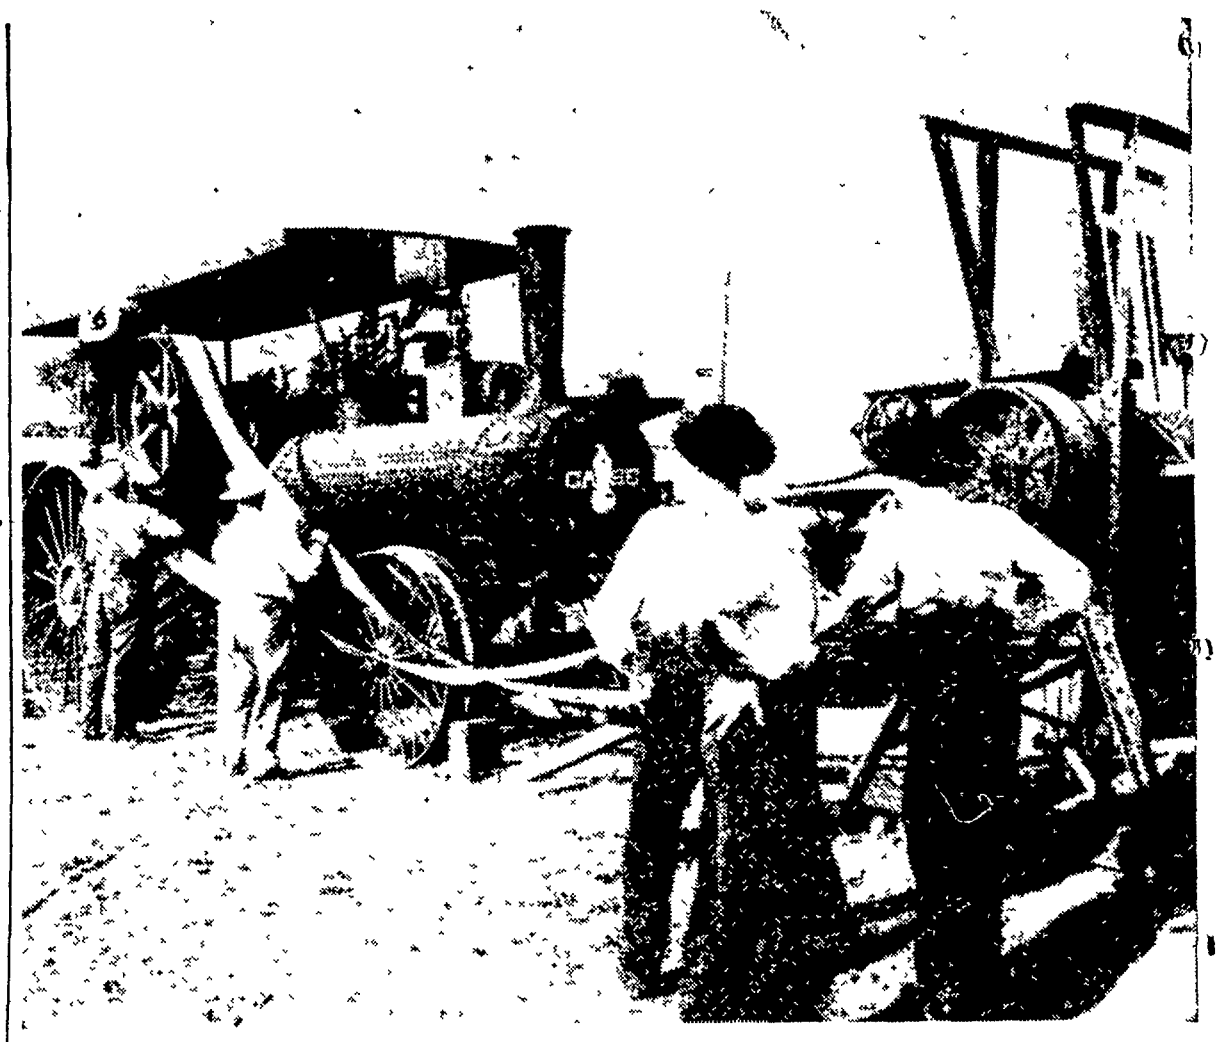
Everett Young, Kinzers, was re-elected president of the association Other officers named Friday night were first vice president, M D. Mast, Lancaster, second vice president, W G Eshleman, Lancaster, secretary treasurer, Mrs Jane Y Brackbill, Kinzers, chaplin, the Rev. Elmer Ritzman, Enola and solicitor, Ralph W Eby, Paradise

'Green Plasma' Not Tested USDA Declares

The U S Department of Agriculture today reported that its turf specialists have never tested a product called "Green Plasma," contrary to claims made in advertisements that have appeared recently in a number of newspapers in various parts of the United States

Promoters of the product have described it as a sensational color-restorer for lawns, discovered by a German scientist, and tested by the U S Department of Agriculture The product is further claimed to be "the very same type wonder treatment" used on the Capitol lawn in Washington, D.C.

Scientists of USDA's Agricultural Research Service who test plant foods and fertilizers, and dyes sometimes used to color plants, point out that they have not tested the advertised product, and have made no recommendations regarding its use.



ONE OF THE MARKS OF SKILL of a steam engineer is his ability to belt-up to a piece of equipment quickly and easily. One of the events to determine this skill at the Ninth Annual Reunion of the Rough and Tumble Engineers Historical Society was belting up to a large fan with a short belt and the engine on a down grade. (LF Photo)
